

How to scan your PC with ESET Endpoint Antivirus

*Scanning process takes approximately 30 minutes.
Please try the process when you have enough time.

1. Click on 「△」 on the right side of taskbar and right-click on Endpoint Antivirus icon on the list.

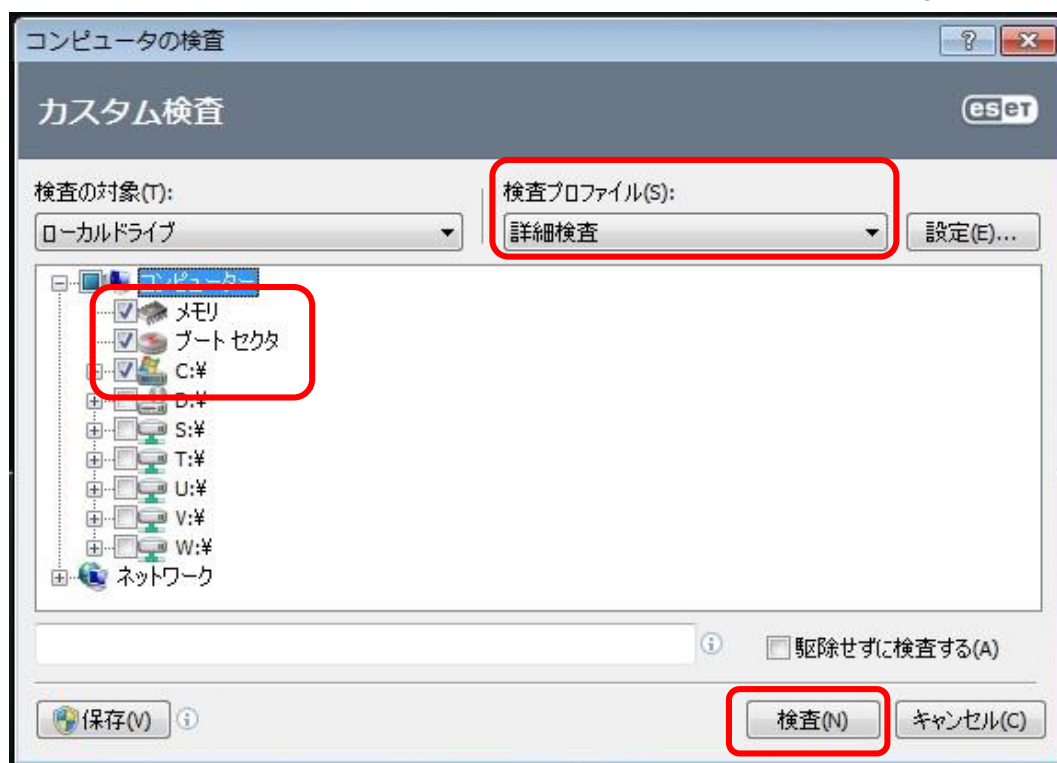

2. Click on “ESET Endpoint Antivirus を開く.”

3. Click on “コンピュータの検査” and from the list on the right side click on “カスタム検査.”

4. Choose “詳細検査” in the drop-down list under “検査プロファイル” and select the checkboxes next to “メモリ,” “ブートセクタ,” and “C:¥.” Then click on “検査(N)” on the bottom right corner.

5. Now scanning begins. Thank you for your cooperation.
